

Applying the Cinch

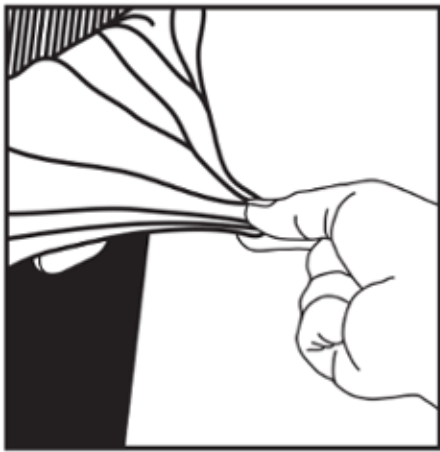

Make sure the surface you are applying the Cinch to is clean and dry. We recommend cleaning the surface with isopropyl alcohol.

Peel the backing off the Cinch and place it just under the rim of the trash can as shown and press firmly.

The permanent adhesive can take up to 24 hours to fully bond (recommended). Using sooner can result in a weaker bond.

Securing the Trash Bag

Just "Pinch-it"

Place the trash bag in the can and drape it around the rim. Then pinch the edge of the liner (closest to the Cinch) out to form a "tail".

and

Poke the "tail" just slightly through the top of the Cinch and use your other hand to grab the tail and pull it down from the bottom.

"Cinch-it!"

Pull more of the bag down through the Cinch until it is tight around the rim of the can.

WARNING: DO NOT PUT FINGER ALL THE WAY THROUGH THE CINCH OPENING. Doing so will cause the Cinch to pinch your finger!
